Grease That Plow

The best tools go soon enough. Ounces of grease save dollars in repairs.

The seeds of rust and decay bring a harvest of loss to the farmer.

If machinery displaces men and horses it demands more care than ever.

Keeping the polish on a moldboard may be better than shining in society.

Simplicity, reliability, durability, and accessibility should be sought when you buy tools.

At the University farm we get good results from a mixture of whitening and hard oil. First make a thick paste then thin it by adding more oil. Apply to the moldboard with a brush and rub off with a gunny sack just before using the implements in the spring.

CHARLEY GRASTY SCARED

A Brunswick Boy Abroad Says We're Hated.

The Kansas City Star, a paper for which Chas. H. Grasty used to report, gives several extracts from a speech made by him in Baltimore Saturday night. Charley had been abroad as a war correspondent and just returned, and that what he saw and heard got his goat, there's no use denying. "From what I saw and heard on the other side, I can say in all truth that this country has not there a friend—not one. You can girdle this globe from Mexico to China and back again and you won't find any man, white or black who isn't aching for a chance after this war is over to get at the wealth and war profits of this overfed helpless giant—the United States."

Charles says its the Monroe doctrine which has alienated everybody against us, and the inference is he advocates its repeal, but he in express words advocates the training of every young man and boy in this country and fit him in every way for soldiering.

So far as the Monroe doctrine is concerned, it is here to remain and be enforced. To do away with it because foreign nations do not like it, would be worse than not having a man who could hit a flock of barns with a riot gun. The fact that it is complained against by foreign nations is sufficiently indicative of the fact that they would obtain a foothold on this side; then we would need soldiers and battleships galore. We should operate the Monroe doctrine both ways, however. Under it not only keep others off this side of the globe, but ourselves off the other side. We should get rid of the Philippines and grab no more islands on the other side of the dead line and keep our national nose out of fracas between others not on north American territory.

As for forcing military training generally, Grasty is wrong again. A nation of soldiers will fight on slight or no provocation. If necessary to our defense, another Washington will appear and head an army well enough trained from the various military and other places inculcating the rudiments.

If the many suggestions for preparedness are followed in this country, we will find ourselves as deeply in debt in a few years as any now at war. A navy on both oceans larger than any other, an army greater than all others who might combine against us, the Panama Canal, not yet clear of further cost and many other things figured on in millions. The time is here for level heads to get busy and disperse spook hatters, secret agents of ammunition factories and literary adjuncts of loan syndicates.

Colds Expensive

Don't get a cold this year if you can help it. Quinine has gone up at least 500 per cent in price and is going higher. The war is responsible for it. Colds are expensive.

Dr. Cleveland of Brunswick was in town Sunday evening.

OLDER BUT STRONGER

To be healthy at seventy, prepare at forty, is sound advice, because the strength of middle life we too often forget that neglected colds, or careless treatment of slight aches and pains, simply undermine strength and bring chronic weakness for later years.

To be stronger when older, keep your blood pure and rich and active with the strength-building and blood-nourishing properties of Scott's Emulsion which is food, a tonic and a medicine to keep your blood rich, alleviate rheumatism, avoid sickness. No alcohol in Scott's Emulsion. Scott & Borne, Bloomfield, N. J.
